There are some good examples, which teach me things I wouldn't otherwise get.

Student 6
It complement what I learned in the lecture.

We review the material.

Student 8

computer science is really hard.

Student 12

Explain the material more specifically than in the lecture

Student 13

Discussion is useful in reviewing the concepts learned in class since we usually speed through the material. Discussion is also helpful for learning more about the requirements for the projects.

Student 4
Great job :)

Student 5
Yes. The material he covers is often not relevant to what we are currently working on. Each lecture he has covered topics that are in the future. For example, when we were in the middle of project 2, he spent the discussion time covering concepts we had not yet heard of that we would need for chapter 3. I'm not sure why this is. It would seem much more logical to teach the same material as the rest of the course, and on the same schedule.

Student 6
His oral English need to be improved.

This instructor is very helpful during office hours, but sometimes the discussion power points are bland.

I think he does a very good job of explaining and reviewing the material. He seems extremely knowledgeable. Sometimes I wish we would go over some of the project specs that are a little confusing, but I can ask him questions if I want to and I am not sure how much he is allowed to tell us.

Is there any way that we can have piazza be more organized? I have posted questions that got deleted because they have been asked already, but a week before. A lot of people cannot seem to come up with a title useful enough to be searchable and therefore it is difficult to find the answers. Can we make it mandatory to label questions under "project #" or "zyante" for example? Can we also have a separate label for people who have problems with the autograder or interpreting the feedback or failing functions? It is very difficult to browse piazza looking for helpful things when all of the questions are individual based. Thank you.
