*Not actually too helpful other than to repeat what we did in class.*

Student 5

*More reinforcement and less slowness.*

Student 6

NA

Student 7

*Possibly do more active coding in class rather than slides.*

Student 8

*Not enough project related notes*

Student 15

*Have more interactive activities. This feels like another lecture. I learn a lot, but it would be nice to have a different type of learning besides powerpoint and lecture. I'm not sure what a discussion section for computer programming should consist of, but maybe games could be something that would make it different from lecture. I do like how you give us problems to figure out code for. They are challenging, but interactive.*

Student 16

*The instructor is very enthusiastic about conveying the material, and he goes through the material in an easy to understand manner, as well as responding to student questions clearly and respectfully.*

*i love his example problems at the end of the class. they're challenging but still doable. sometimes i feel like shibu gets really excited and talks about things that are a bit too complicated for us. but other than that, i think he's doing a pretty good job*
